

Creative Learning Spiral

Inspiring and enabling children to change their world

At the heart of Paper Boat's approach is a **Creative Learning Spiral** that shines a light on the 'waypoints' of any creative learning journey.

It's inspired by MIT Media Labs '*Creative Learning programme*':

The **Creative Learning Spiral** enables Paper Boat to...

...**design cutting-edge tools** and approaches for use in our Children's Hubs so that we can *inspire and enable children to change their world*.

...**use a common language** that connects our Paper Boat Community allowing us to collaborate more effectively and *help children to voyage beyond their horizons*.

...**embed creative learning** into all aspects of our operations so that we can act as a learning organisation and a learning community fixed upon our vision of *a world that unlocks the infinite potential of every child*.

...**gently steer children to waypoints** along their unique journeys as they *set sail on an ocean of endless possibility*.
